LESJÖFORS

THE COMPLETE SPRING SUPPLIER

At Lesjöfors we produce an extensive range of coil springs for the European Car and Light Commercial Vehicle market, from state-of-the-art factories in Sweden.

We have spent over 160 years manufacturing coil springs, and today produce the world's largest range for the automotive aftermarket. We offer our customers high quality products, professional service and excellent availability.

Our philosophy is to produce the complete range to stock. We maintain large stocks at each of our distribution centres, in Sweden, Germany, Russia, and the UK, to ensure excellent availability and short lead times for our customers across Europe and worldwide.

Our products hold the same quality as those of vehicle manufacturers and can therefore be used, with confidence, by authorised repair workshops, without any warranty restrictions. Details of the various production steps can be seen overleaf.

In order to guarantee customers the best service and quality, Lesjöfors are certified to IATF 16949, ISO 9001 and ISO 14001 for both quality and environment. In addition, we have the EAC certificate of conformity as required for the Russian market.

Lesjöfors also produce a comprehensive range of gas springs for tailgates and bonnets, and sport springs for vehicle lowering. Additionally, Lesjöfors offer a wide range of leaf springs and U-bolts.

Important Information

1. Application

- 1.1. Unless specifically stated otherwise, the listings in this catalogue are for 2WD hatchback or saloon cars with petrol engines, and not for vehicles equipped with self-levelling, eco, off-road or sport-suspension.
- 1.2. As a general rule hatchback, saloon and estate models typically have the same front springs; whilst petrol and diesel models typically have the same rear springs. There are some exceptions.
- 1.3. Design code illustrations for each spring type can be seen by folding out the rear cover flap.

2. Safety

- 2.1. For safety, suspension springs should always be replaced in axle pairs. Different springs on the same axle may cause an imbalance in the suspension, adversely affecting vehicle handling and braking. Our Guarantee applies only when springs have been replaced in axle pairs.
- 2.2. Always check the spring size and end shapes are correct prior to attempting fitment. Springs should be fitted with the same orientation as the original equipment spring.
- 2.3. Appropriate care should be taken when replacing a spring. A compressed spring holds a huge force and could cause serious injury if it came loose during fitment. Special tools should always be used to compress a spring.
- 2.4. For safety, spring installation should only be undertaken by a competent person and instructions from a recognised repair manual should be followed.
- 2.5. Spring pans, bushings and link-arms should always be checked for damage and replaced if necessary.
- 2.6. After installation, springs should be checked to ensure they are correctly located at the ends and are not too short or loose. Wheel alignment should also be checked.

3. Design and warranty

- 3.1. Our springs are designed based on specific OEM-specifications and may cover more than one OE spring reference. There are cases where we produce a slightly modified version of the OEM spring to improve durability; whilst maintaining the same performance characteristics and ride height.
- 3.2. Some OE coil springs are manufactured from tapered wire (progressive material thickness) which can be prone to premature failure. All the springs we produce are designed in and manufactured from parallel wire, and give the same spring performance and ride height as the OE spring. They are guaranteed to be of high quality and are covered by our 3 year warranty. Also listed in this catalogue are the tapered wire versions, to support our customers with a choice: These come with a 2 year warranty.

4. Quality

- 4.1. All our springs are manufactured in accordance with ISO9001 & ISO14001, and in a IATF 16949 environment.

5. Heavy duty springs

- 5.1. The heavy duty springs listed in this catalogue are designed to be 10-30% stiffer than the standard spring. It should be noted that heavy duty springs do not increase the maximum load carrying capacity of a vehicle.
- 5.2. We recommended using heavy duty rear coil springs on vehicles that regularly carry a heavy load or tow a trailer.
- 5.3. In a small number of cases heavy duty front coil springs are listed; for certain Mercedes models with air conditioning and automatic transition for example.
- 5.4. The benefits of using heavy duty springs are improved road holding and a reduced "sitting down" effect.

Manufacturing methods

The Lesjöfors Factory

Lesjöfors' state of the art manufacturing process - designed to meet the demands of quality, flexibility, and the environment for many years to come.

2. Spring Coiling

High quality spring steel is cold formed into shape using computer controlled automatic coiling machines, allowing Lesjöfors to manufacture springs with advanced end coils and side load coil designs.

1. Spring Steel

Every spring is manufactured from high quality spring steel. Depending on the spring design, pre-hardened and tempered or annealed wire is used.

3. Heat Treatment

When pre-heat treated wire is used, all springs are stress relieved. This treatment improves the fatigue strength. Springs manufactured from annealed wire are hardened and tempered after the coiling operation.

4. Grinding

Some chassis spring designs have one or both ends ground. At Lesjöfors this grinding is done in special computer controlled spring grinding machines.

5. Shot Peening

All Lesjöfors chassis springs are shot-peened; a treatment where all surfaces of the spring are bombarded with small steel shots. The treatment improves the fatigue strength of each spring and provides an optimum surface for paint adhesion.

6. Pre-setting and Testing

Where the design requires it, Lesjöfors springs are fully compressed and tested before leaving the factory. The pre-setting operation improves the fatigue life and relaxation performance of each spring.

7. Surface Treatment

Springs are protected from corrosion using an advanced zinc phosphate pre-coat and epoxy powder resin paint system. This treatment has tough and highly durable properties.

8. Marking

All coil springs are clearly marked with a part number and batch number for full product traceability.

9. Labelling and Packing

Finally, springs are packed in boxes which are labelled with the part number and a bar code.

Some Mercedes models have suspensions where the ride height can be "fine-tuned" by the use of rubber shims / spring spacers.									
* = Cars with more than one piece of extra equipment e.g. air condition, automatic transmission etc.

 85 From Chassis no. 582633-.
 86 Only for vehicles with Chassis no. Y at 10th position.
 87 Up to Chassis no. -41048789.
 88 From Chassis no. 41048790-.
 89 Up to Chassis no. -48045597.
 90 From Chassis no. 48045598-.
 91 Up to Chassis no. -8Z*2*070 000.
 92 From Chassis no. 8Z*3*000 001-.
 135 Not suitable for Sports Line.
 136 Up to Chassis no. 15-E-010000*.
 137 From Chassis no. 15-E-010000*.
 138 Only suitable for vehicles with 1490kg maximum rear axle load.
 139 Not suitable for MPS.
 140 Not suitable for T5.
 141 Only suitable for vehicles with 1720kg maximum rear axle load.
 142 Up to Chassis no. 751044.
 143 From Chassis no. 751045.
 144 Only suitable for vehicles with rear OE spring marked colour code Red
 145 Only suitable for vehicles with rear OE spring marked colour code Green
 148 Not suitable for ABC.
 149 Not suitable for Brabus
 150 From Chassis no. M45255-.
 151 Up to Chassis no. 2087505
 152 From Chassis no. 2087506
 153 From Chassis no. 3301665
 154 Also for SXi when equipped with lowered sport chassis
 155 Not suitable for S-line.
 156 Check the spring design to select correct spring.
 157 Not suitable for Hunter
 158 Standard springs are not suitable for vehicles equipped with heavy duty suspension
 159 Not suitable for vehicles equipped with Four-C
 161 For vehicles with rear springs having colour code Red-Brown, use Heavy Duty rear springs from Syncro
 162 Up to Chassis no. 602984
 163 From Chassis no. 602985
 164 Not suitable for Abarth
 165 Not suitable for Outback
 166 Not suitable for VTS
 167 Not suitable for VTR
 168 Not suitable for Hybrid Traction
 169 Up to RPO 12228
 170 From RPO 12229
 171 Not suitable for vehicles equipped with FlexFix
 172 Only for vehicles with Chassis no. U at the 11th position.
 173 Only for vehicles with Chassis no. J at the 11th position.
 174 Only for vehicles with strut type suspension.
 175 Not suitable for XL-7
 176 Please check the upper and lower spring seats including bump stops on the vehicle for damage or wear.
 177 Only for vehicles with Chassis no. K at the 11th position.
 178 Only for vehicles with Chassis no. L at the 11th position.
 179 Not suitable for Nismo
 180 Only for vehicles with rigid rear axle
 181 Not suitable for vehicles equipped with Rough Road specifications
 182 Tapered wire design
 183 Only suitable for vehicles with front OE spring marked colour code Blue / Yellow
 184 Not suitable for vehicles equipped with Active Height Control
 185 Only suitable for vehicles manufactured in South Africa
 186 Up to Chassis no. 3603471
 187 From Chassis no. 3603472
 188 Not suitable for Adam Rocks
 189 Not suitable for vehicles equipped with SMG
 282 Not suitable for GBT
 283 Not suitable for Turbo X
 284 Not suitable for Hybrid
 285 Not suitable for Super Sport Package
 286 For vehicles with front OE spring marked colour code: Red / Brown / Orange or Red / Pink / Orange or Red / Brown / White
 287 For vehicles with front OE spring marked colour code: Red / Brown / Violet

286 Dla pojazdów z oryginalną sprężyną z przodu oznaczoną kolorem: czerwonym / brązowym / pomarańczowym lub czerwonym / różowym / pomarańczowym lub czerwonym / brązowym / białym
287 Dla pojazdów z oryginalną sprężyną z przodu oznaczoną kolorem: czerwonym / brązowym / fioletowym
288 Dla pojazdów z oryginalną sprężyną z przodu oznaczoną kolorem: czerwonym / różowym / fioletowym lub czerwonym / brązowym / niebieskim
289 Dla pojazdów z oryginalną sprężyną z przodu oznaczoną kolorem: czerwonym / różowym / niebieskim
290 Dla pojazdów z oryginalną sprężyną z przodu oznaczoną kolorem: białym x2 / pomarańczowym x1 / żółtym x1 lub białym x2 / brązowym x1 / żółtym x1
291 Dla pojazdów z oryginalną sprężyną z przodu oznaczoną kolorem: białym x1 / zielonym x1 / fioletowym x1 / żółtym x1 lub białym x1 / pomarańczowym x1 / fioletowym x1 / żółtym x1
292 Dla pojazdów z oryginalną sprężyną z przodu oznaczoną kolorem: białym x2 / brązowym x1 / żółtym x1
293 Dla pojazdów z oryginalną sprężyną z przodu oznaczoną kolorem: białym x1 / brązowym x1 / fioletowym x1 / żółtym x1
294 Nie nadaje się do modelu ST
295 Nie nadaje się do Cross Country
296 Dla pojazdów z oryginalną sprężyną z przodu oznaczoną kolorem: żółtym
297 Dla pojazdów z oryginalną sprężyną z przodu oznaczoną kolorem: zielonym
298 Dla pojazdów z oryginalną sprężyną z przodu oznaczoną kolorem: brązowym
299 Dla pojazdów z oryginalną sprężyną z przodu oznaczoną kolorem: różowym
